## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2, from which claims 3-10 depend directly or indirectly, recites "said second printing means...." There is no proper antecedent basis for a second printing means and ,further, the Examiner is not able to determine the scope of the invention because he can not determine the structural relationships between the recited elements.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Morgavi (5,558,449).

With respect to Claim 1, Morgavi teaches the at least one printing means 10, the intermediate transfer means 12, the over-coating means 13 and the transfer means(motion of 10) on the front page diagram. It is noted that the over coating means

13 and the transfer means are at least at the same x-coordinate position as illustrated on the front page diagram.
